

QuickTest Pro QuickStart

Orasi™ Software, Inc. provides a proven solution for organizations to successfully implement HP Software's software testing tool, HP QuickTest Professional. Orasi's solution is an accelerated and cost-effective approach focused on the proper use of the methods, tools and techniques required to implement an effective regression testing process throughout your organization.

The QuickTest Pro QuickStart provides a framework that:

- defines or customizes your existing regression test planning and management process
- uses industry-proven templates customized to your environment
- uses hands-on mentoring to ensure knowledge and skills transfer to make your staff members self-sufficient

The QuickTest Pro QuickStart is designed to give you a road map for training and implementation, enabling your testing team to be productive in a matter of days. The QuickStart comprises the following components:

- product training
- product installation
- product and process mentoring services

Product Training

The QuickTest Pro QuickStart includes complete product training for the tool, delivered by a certified HP Software trainer. On-site training is conducted for a maximum of 12 students.

Product Installation

To allow you to begin receiving the benefits of HP QuickTest Pro as quickly as possible, the QuickStart includes installation and configuration of the product. An experienced Orasi engineer mentors your staff on the proper installation and setup of HP QuickTest Pro within your quality assurance environment. In addition, the engineer mentors your staff members on the procedures for using HP QuickTest Pro most effectively within your organization.

Product and Process Mentoring Services

To make your team productive immediately, the QuickTest Pro QuickStart includes mentoring services tailored to meet your needs. The services focus on essential software test planning, testing processes, standards and practices designed for HP QuickTest Pro.

With the QuickTest Pro QuickStart, you can implement the tools necessary to streamline your test planning and management processes, train your staff and begin seeing a return on your investment in just a few days. Tailoring training and deliverables to meet your needs and unique environment, the QuickTest Pro QuickStart provides you with a proven road map for success.

Does repetitive testing, such as regression testing, occupy the majority of your resources and schedule?

Are you looking for a way to increase test coverage without increasing headcount?

Would you like to implement test automation without the steep learning curve?

Would you like to use multiple data combinations in a single test?

The QuickTest Pro QuickStart can be purchased in 10 or 15 day increments, with additional days added depending upon your needs. During the initial QuickStart, a scoping effort also may be performed on specified test automation projects to determine required time and resources for successful completion. Additional days then can be purchased to support longer term engagements. The following chart details deliverables.

	Deliverables	Duration	Description
QuickTest Pro 10	Product training	3 days	Gives students a basic understanding and knowledge of HP QuickTest Pro
	Product installation and configuration	1 day	QuickTest Pro installed and operational
	HP QuickTest Pro Action Plan	2 days	Documented action plan for product roll-out and/or optional scoping of specified projects
	Design and execute first automated tests	4 days	Design and execute test scripts for a pilot application using the documented action plan designed previously. Includes "conversion" of existing WinRunner scripts.
QuickTest Pro 15	QuickTest Pro 10 deliverables	10 days	Same as QuickTest Pro 10
	Design and execute additional scripts	3 days	Produce additional scripts for pilot application and/or develop scripts for an additional application
	Design standards and documentation	2 days	Produce standards and procedures documentation
QuickTest Pro 15+	QuickTest Pro 15 deliverables	15 days	Same as QuickTest Pro 15
	Design and execute additional scripts	Additional days	Produce additional scripts for pilot application and/or develop as needed scripts for an additional application
